

REMARKS

Applicants amend the cross-references section of the present application to reflect the complete and accurate identification of a parent application, now an issued patent.

Applicants amend the claims through the addition of new independent claim 4 and dependent claim 5. Applicants believe the new claims properly reflect the scope of patent protection to which the applicants are entitled. The original claims, as filed, are not amended.

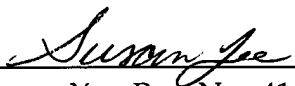

Applicants amend Figures 10 and 14 in the drawings to correct typographical errors. Annotated figures reflecting these corrections accompany the new drawings. No new matter is added by these corrections.

Applicants request favorable consideration of these amendments.

Respectfully submitted,
Steven F. Reiber et al.
